

Overview:

Designed for phlebotomy procedures, this fixed height chair features manual synchronised adjustment of the backrest and foot section for patient positioning. This facility enables the clinician to sit the patient comfortably and also provides a flat surface with head-down recovery facility. The chair provides a comfortable sitting position and is supplied with a pair of multi positional phlebotomy arms with height and angle adjustment. The chair is available with fixed non slip feet or braked castors and is ideal for GP Surgeries and health centres etc.
