

Comprehensive & easy to use integrated ECG system

Whether you are looking for an innovative resting ECG that offers both, medical Bluetooth connectivity and a USB cabled option or a full performance ECG that is easy to integrate, seca has the perfect solution.

Dr. Veerappan is a GP Principal at Tunstall Primary Care Centre and the Chair & Clinical Director of North Staffordshire GP Federation. He has a special interest in Diabetes and Endocrinology, plus is a GP trainer, and an Appraiser. He also works in CQC as a Specialist Adviser.

Dr. Annamalai Veerappan
Chair & Clinical Director

Here is an overview of what Dr. Veerappan thinks about the seca CT331 Bluetooth ECG, which his team use:

“I have found it to be the most reliable ECG I have ever used in a GP Surgery. We have saved lots of time thanks to the EMIS integration, which also makes a significant improvement to patient safety. It is easy to use, light weight, transferrable between different clinical rooms in surgery and small and compact enough to even carry for home visits.

seca’s technical support and customer service team have been excellent, helping us install the software and also train the staff how to use the ECG. The seca CT331 is reliable, safe and easy to keep clean and disinfect.”

seca CT331

Resting ECG with USB and Bluetooth interface

The innovative seca CT331 offers the best of both: Medical Bluetooth connectivity and USB cabled option.

- + Wireless and lightweight
- + Transfer data via Bluetooth or USB cable
- + Rechargeable inbuilt batteries for up to 12 hours of runtime
- + Brilliant recording quality of all twelve leads with a sampling rate of up to 32 kHz
- + LED's for ECG quality and individual lead-on electrode check
- + Clear surface for quick and easy disinfection
- + Fully integrated with EMIS & SystmOne (Vision integration coming soon)

Compatible with all EMR systems

seca CT330

Resting ECG with USB

The fastest way to a full performance ECG. Easily integrate the seca CT330 into your daily routine.

- + Plug in the USB connector and start a high quality 12 lead ECG acquisition
- + Brilliant recording quality of all twelve leads with a sampling rate of up to 32 kHz
- + Status LED for each lead guarantees safe ECG acquisition
- + True wave filter technology for perfect ECG signal quality in every situation
- + Clear surface for quick and easy disinfection
- + Fully integrated with EMIS & SystmOne (Vision integration coming soon)

Compatible with all EMR systems
